

THE AMERICAN ASSOCIATION FOR CANCER RESEARCH (AACR), MOFFITT CANCER CENTER, AND BIDEN CANCER INITIATIVE

In partnership with

American Cancer Society Cancer Action Network (ACS CAN), American Society of Clinical Oncology (ASCO), Association of American Cancer Institutes (AACI), Prevent Cancer Foundation, St. Jude Children's Research Hospital, and the Union for International Cancer Control (UICC).

Invite you to a briefing:

LET'S END HPV-RELATED CANCERS

Thursday, June 27, 2019

12:00 p.m. – 1:30 p.m. Eastern

**Rayburn House Office Building | Room 2044
Washington, DC**

Cancers caused by human papillomavirus (HPV) represent a significant disease burden in the United States and globally. Over 33,000 HPV-related cancers are diagnosed annually among men and women in the U.S. alone. These include oropharyngeal, cervical, anal, vulvar, penile and vaginal cancers. Globally, 630,000 cases of HPV-related cancers are diagnosed each year.

Due to advances in vaccination, screening and treatment, the elimination of cervical cancer—and ultimately all HPV-related cancers—is within reach. However, this goal will require a strong commitment from governments, health organizations, parents and other stakeholders around the world. The U.S. is in a position to lead by achieving elimination of HPV-related cancers domestically while also supporting global efforts.

We welcome you to attend this briefing, where you will hear from speakers representing a diverse range of expertise in domestic and global health about current interventions against HPV-related cancers and what needs to be done to achieve elimination.
