

The **Association of American Cancer Institutes (AACI)** represents more than 100 academic and freestanding cancer centers in the United States and Canada, including the 74 U.S. cancer centers designated by the **National Cancer Institute (NCI)**.

AACI OFFICERS

President

Joann B. Sweasy, PhD
Fred & Pamela Buffett Cancer Center

Vice President/President-elect

Cornelia Ulrich, MS, PhD
Huntsman Cancer Institute at the University of Utah

Immediate Past President

Robert A. Winn, MD
VCU Massey Comprehensive Cancer Center

Treasurer

David M. Gosky, MA, MBA
The Ohio State University Comprehensive Cancer Center - The James

Executive Director

Jennifer W. Pegher, MA, MBA
Association of American Cancer Institutes

AACI BOARD OF DIRECTORS

Raymond N. DuBois, MD, PhD
*Hollings Cancer Center
Medical University of South Carolina*

B. Mark Evers, MD, FACS
UK Markey Cancer Center

Kelvin Lee, MD
Indiana University Melvin and Bren Simon Comprehensive Cancer Center

Suresh Ramalingam, MD
Winship Cancer Institute of Emory University

Yolanda Sanchez, PhD
University of New Mexico Comprehensive Cancer Center

Gary K. Schwartz, MD
Case Comprehensive Cancer Center

Diane M. Simeone, MD
UC San Diego Moores Cancer Center

Barry P. Sleckman, MD, PhD
O'Neal Comprehensive Cancer Center at the University of Alabama at Birmingham

Programs & Education

Navigating the oncology ecosystem

CLINICAL RESEARCH INNOVATION

Promoting the efficient and effective operation of cancer clinical research offices

PHYSICIAN CLINICAL LEADERSHIP INITIATIVE

Providing a forum to develop best practices for clinical and quality care programs

CELLULAR THERAPY INITIATIVE

Making cellular therapies more accessible for patients

PRESIDENTIAL INITIATIVE

Understanding Access to Cancer Care

PUBLIC POLICY

Advocating for legislation that supports cancer research and patient care

LISTSERVS

Providing a forum for discussions on specific roles and topics

WEBINARS *In partnership with Medlive*

Educating physician clinical leaders, data scientists, and other AACI members

COMMUNICATIONS *AACI Update and AACI Commentary*

Sharing news and thought leadership from AACI cancer centers

Meetings & Events

Connecting with colleagues

2026 AACI/AACR HILL DAY

May 14, Washington, DC

18TH ANNUAL AACI CRI MEETING

June 23-25, Rosemont, IL

2026 IMPACT SUMMIT *In partnership with the Cancer Center Network*

October 24, Chicago, IL

2026 AACI LEADERSHIP DEVELOPMENT WORKSHOP

October 24-25, Chicago, IL

2026 AACI/CCAF ANNUAL MEETING

October 25-27, Chicago, IL

All AACI cancer centers rely on stable and predictable federal investments from the NCI and the **National Institutes of Health** (NIH). AACI advocates on behalf of these institutions to accelerate progress against cancer and enable people with cancer to live longer, healthier lives.

NCI-supported research and clinical trials have led to a **34% decrease in deaths from cancer** the past 30 years in the United States – **over 4.8 million lives saved.**

Recent **data from United for Medical Research** show that **every dollar invested in NIH research funding generates \$2.57** in local economic activity – a 250% return.

99.4 percent of drugs or products approved by the FDA between 2010 and 2019 were a result of **NIH-funded research.**

AACI Cancer Centers

Better together

The AACI membership network is comprised of over 100 academic cancer centers in the U.S. **AACI cancer centers are at the forefront of efforts to translate promising research findings into new interventions to prevent and treat cancer.** These cancer centers serve their communities through clinical trials, outreach and education, and job creation. More than two-thirds of AACI members are also designated by the NCI.

NCI: THE BACKBONE OF AMERICAN CANCER RESEARCH

Before 1971 there was no national program to confront cancer. The National Cancer Act changed that with the establishment of the NCI and its Cancer Centers Program. NCI-Designated Cancer Centers form the backbone of the nation's cancer research program. **At any given time, hundreds of research studies are underway at these cancer centers,** ranging from basic laboratory research to clinical assessments of new treatments.

DECADES OF ACCOMPLISHMENTS

For over 50 years, NCI-Designated Cancer Centers have been essential to key developments in cancer therapies, including:

- The development of the first chemotherapy treatments
- The evolution of bone marrow transplants in the U.S.
- The discovery that cancers result from the sequential mutations of oncogenes and tumor suppressor genes

A SOUND INVESTMENT

Stable and predictable federal investments in cancer research pay dividends in economic prosperity, increased survivorship, and improved quality of life for patients whose lives may depend on the next research breakthrough.
