

Introduction & Background

The digital transformation at Sidney Kimmel Comprehensive Cancer Center at Jefferson (SKCCC), while beneficial, has led to research information being dispersed across multiple online platforms. This dispersion hinders the efficiency of our 150+ research staff, complicating access to crucial resources like clinical trial information, SOPs, guidance documents, and more. Consequently, this has led to decreased productivity, inconsistent information access, and challenges in onboarding new staff.

Development & Implementation

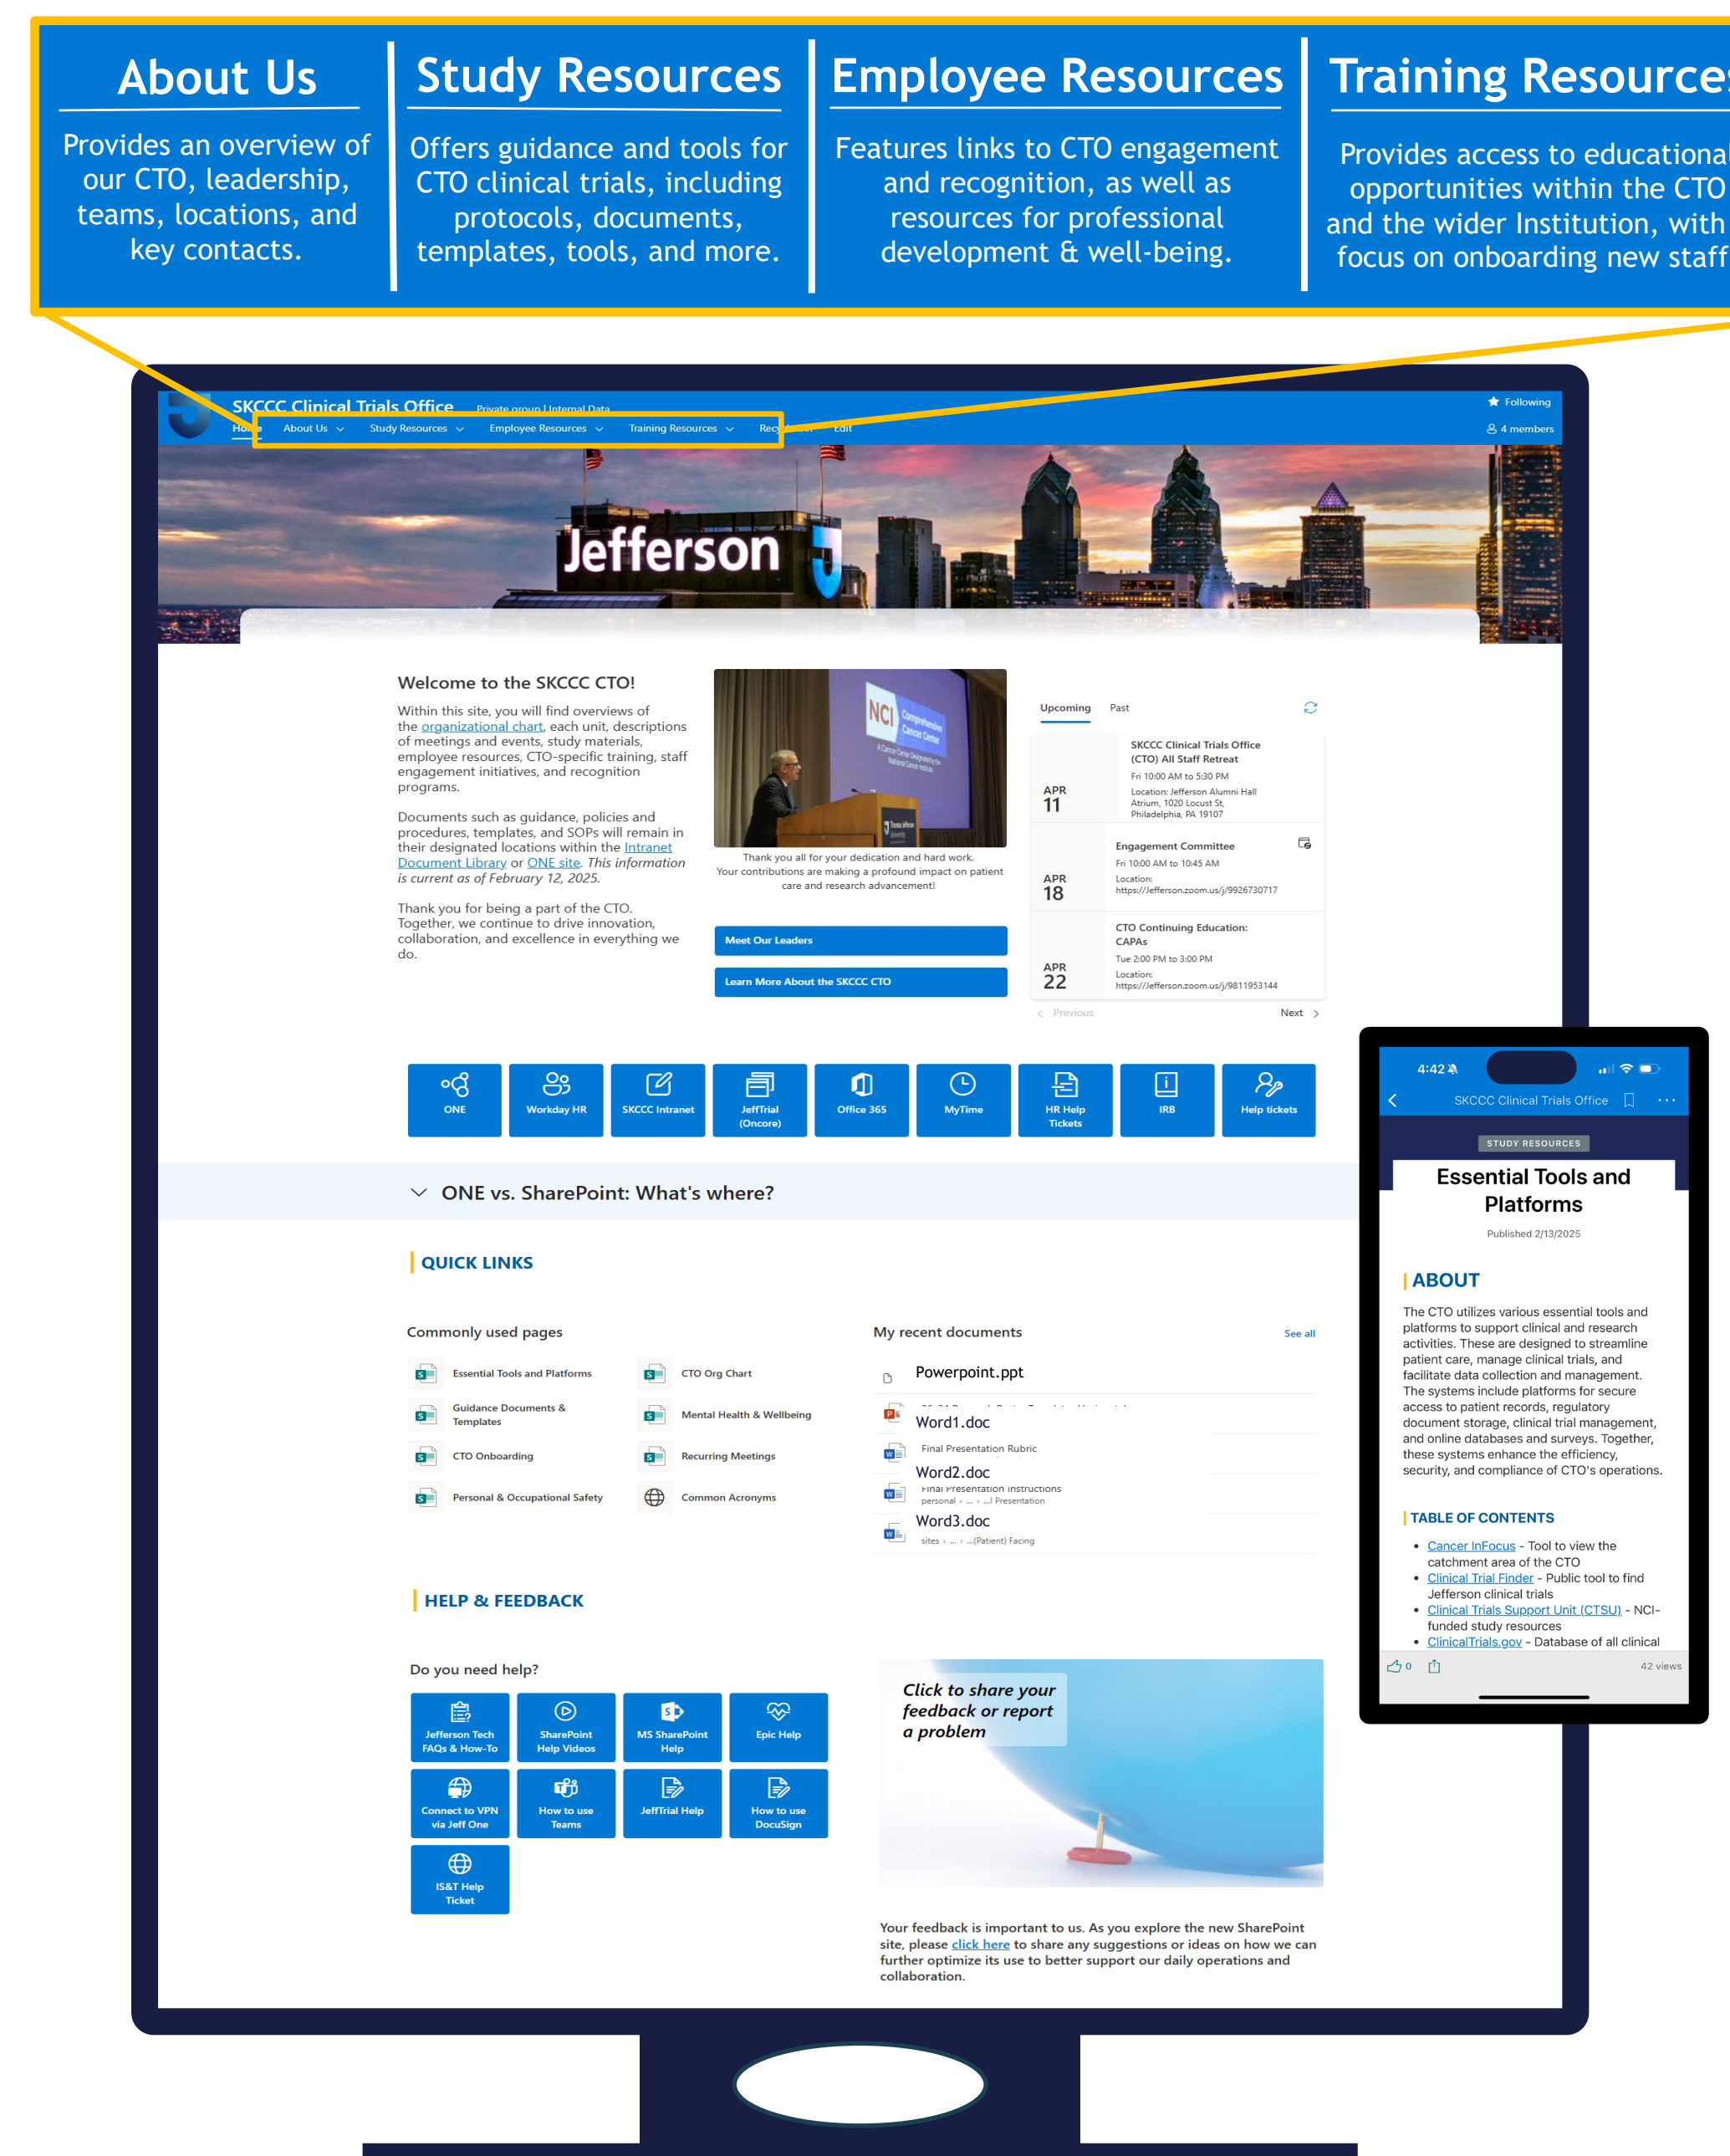

Key Features & Design Highlights

- CENTRALIZED ACCESS**
Single point for all essential research resources
- INTUITIVE NAVIGATION**
Logically categorized information for easy retrieval
- COMPREHENSIVE RESOURCE LIBRARY**
Includes CTO information, SOPs, guidance documents, business resources, and professional development materials
- USER-FRIENDLY DESIGN**
Adaptable and accessible interface
- STREAMLINED ONBOARDING**
Facilitates quick access to necessary information for new staff
- SUPPORTS COLLABORATION**
Fosters a connected research environment

The Solution: Creating a Centralized Hub

We developed a centralized hub for research information using Microsoft SharePoint. This platform consolidates CTO research information, creating a single source of truth for the research community. It features logical categorization, user-friendly navigation, and is continuously refined based on staff feedback. Streamlined access to vital resources, includes:

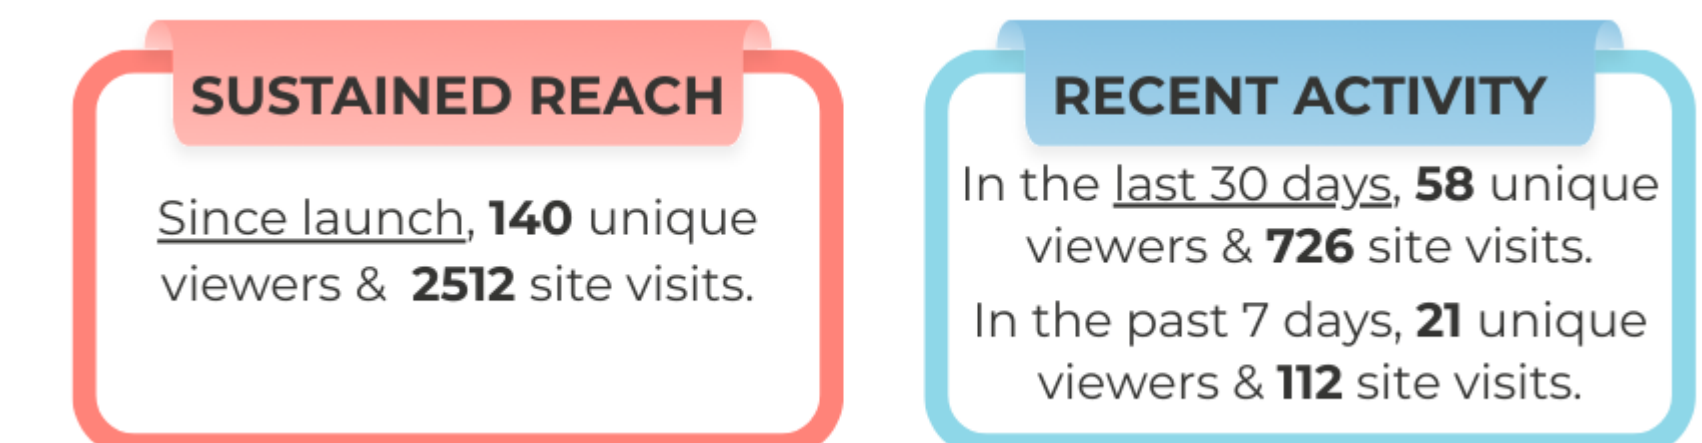

- CTO information, SOPs, and guidance
- Business, personal, and professional development materials
- Team collaboration tools

Outcomes & Impact

The platform's success is evident in its increasing user engagement and consistent site activity.

Data as of **April 14, 2025**, showcases this growth:

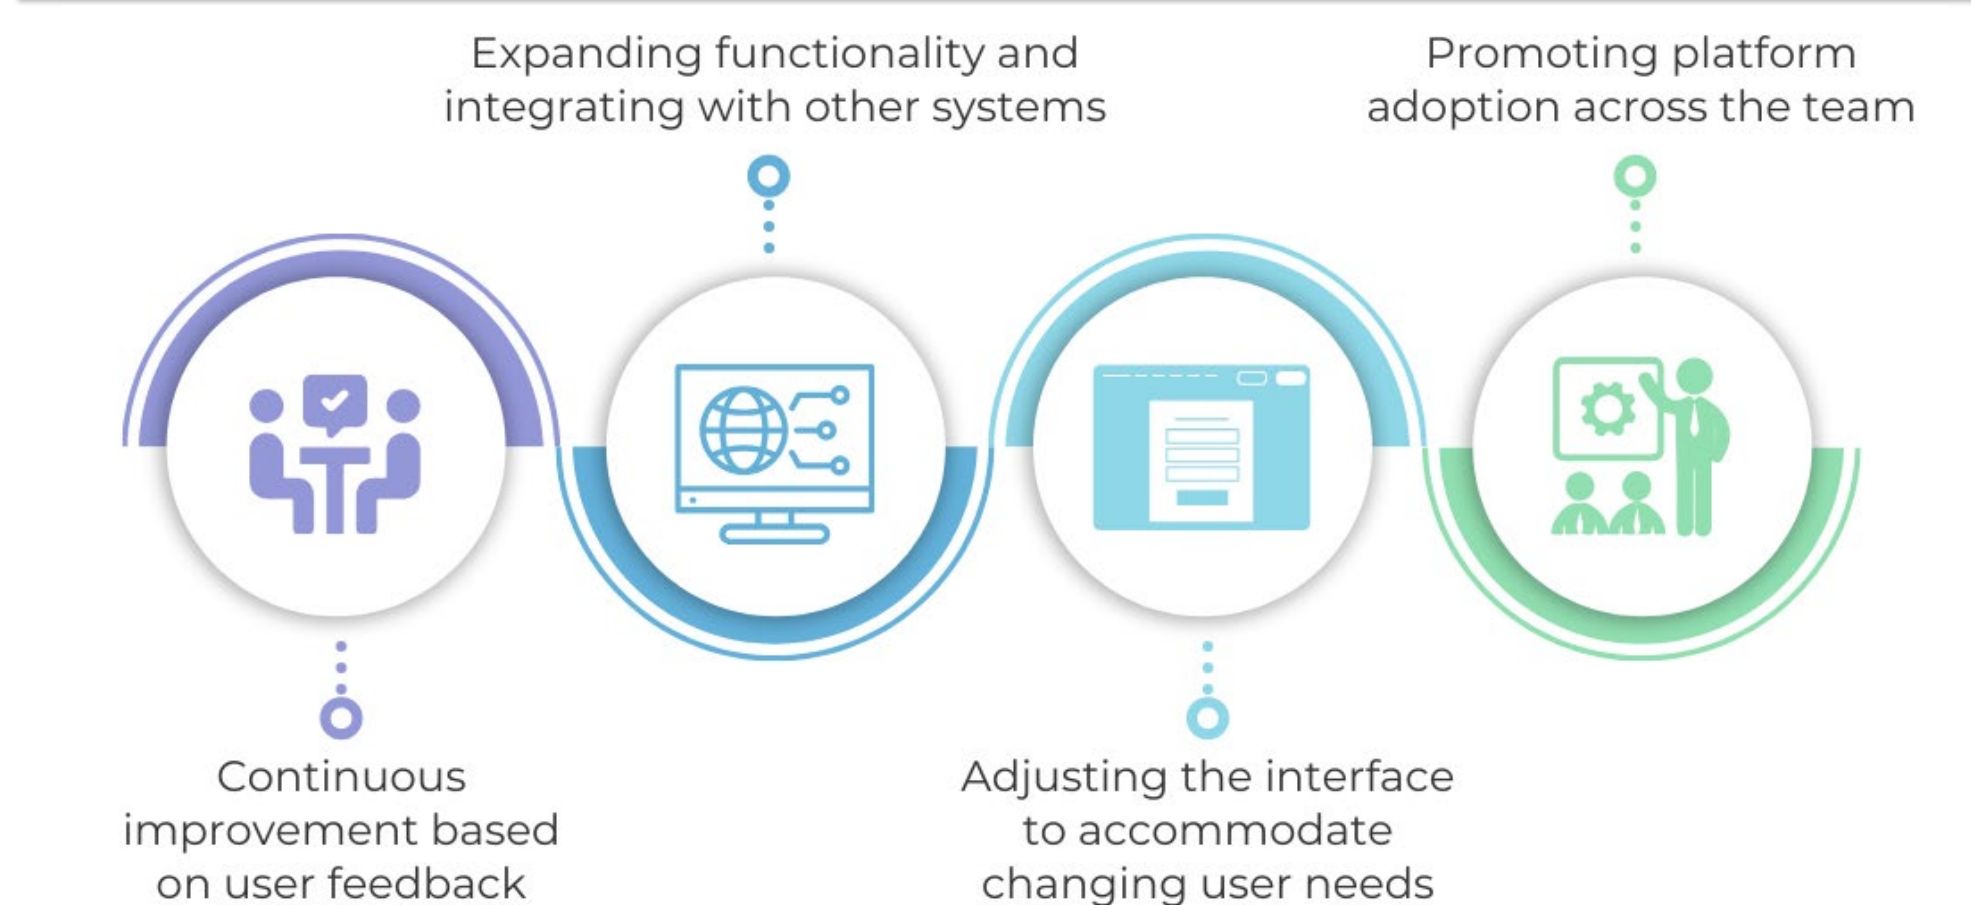

Engagement data underscores the platform's sustained utility and reach. Coupled with positive user feedback on its design and resources, ongoing assessments indicate the platform is effectively supporting information access and driving user engagement.
