

## NEW HAMPSHIRE

## IMPACT

## Economic Impact of Research ${ }^{2}$

- United for Medical Research reports that in Fiscal Year 2022, NIH funded awards totaling $\mathbf{\$ 1 2 2 . 5}$ million in New Hampshire, supporting 1,666 jobs and $\$ 306$ million in economic activity.
- In FY 2022, the biopharmaceutical industry in New Hampshire supported 8,288 jobs and $\mathbf{8 7 2}$ businesses.

NIH FUNDING

A Strong National Priority ${ }^{4}$

Funding for NIH has increased by $\$ 17$ billion, or nearly 58 percent, from FY 2015 to FY 2023. Due to this strong support, NIH is able to support more groundbreaking science - but we can't afford to stop now.

We are advocating for $\$ 50.924$ billion in FY 2024 appropriations for the NIH .

The Biomedical Research and Development Price Index (BRDPI) measures inflation in the cost of biomedical research. The BRDPI line in the chart above shows the level of NIH funding by year had it kept up with this measure.

## Impact of Cancer in New Hampshire ${ }^{3}$

- In 2023, an estimated 1,958,310 new cancer cases will be diagnosed in the United States. Of these cases, 9,580 will reside in New Hampshire.
- In 2023, an estimated 609,820 Americans will lose their lives to cancer, including $\mathbf{2 , 9 1 0}$ residents of New Hampshire.

## MEMBER SPOTLIGHT

## Dartmouth Cancer Center

An NCI-Designated Comprehensive Cancer Center, Dartmouth Cancer Center encompasses all cancerrelated academic activities, patient care, and clinical trials across Dartmouth College and DartmouthHitchcock's health system. Dartmouth Cancer Center's transdisciplinary research infrastructure spans multiple schools and departments. Its research portfolio includes groundbreaking initiatives in cancer immunology, cancer engineering, population and behavioral sciences, targeted therapy, and more. The center emphasizes translating research discoveries to hard-toreach populations, especially within its rural catchment area of New Hampshire and Vermont.
