[AACI Webinar: 340B and Cancer Health Equity](#)

On January 27, AACI hosted a webinar to educate cancer center members on the 340B program, which was created by Congress in 1992 to help vulnerable patients access prescription medicines at safety-net facilities. The program is an important tool for mitigating cancer health disparities and improving access to care among racial and ethnic minorities, low-income individuals, and medically underinsured and uninsured individuals.

The webinar was moderated by **Courtney Lang, JD**, founder and principal of Langco + Partners. Panelists were **Keysha Brooks-Coley**, vice president of federal advocacy & strategic alliances, American Cancer Society Cancer Action Network, Inc. (ACS CAN); **Jeff Davis**, of counsel and senior advisor, Baker Donelson; and **Gerold Bepler, MD, PhD**, president and CEO of Barbara Ann Karmanos Cancer Institute at Wayne State University.
